### Varnish cache

## Going fast slowly

For the sake of simplicity, let us call it a round 150K total lines [1].

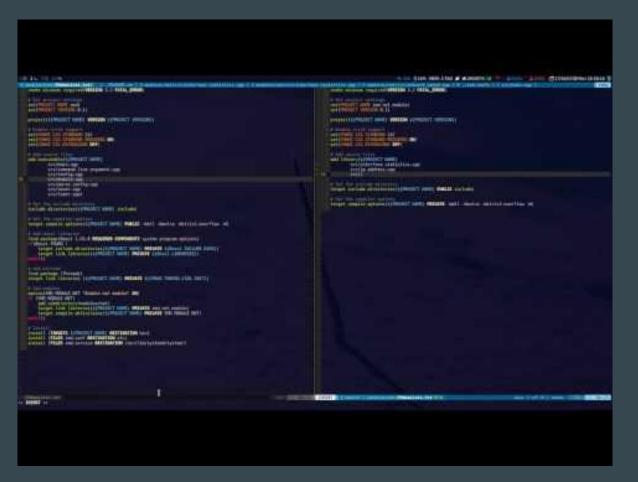

Varnish has been in existence for 10 years, so that's 15K lines per year.

200 workdays a year makes that 75 lines a day.

7.5 hours of work per day gives 10 lines per hour.

# Ay, Dios mío, qué calvario!

NOTHING IS EVER FOOLPROOF, BUT MODERN AIRLINERS ARE INCREDIBLY RESILIENT. FLYING IS THE SAFEST WAY TO TRAVEL.

#### ASKING BUILDING ENGINEERS ABOUT ELEVATOR SAFETY:

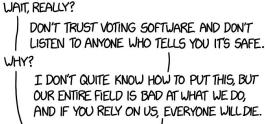

ELEVATORS ARE PROTECTED BY MULTIPLE TRIED-AND-TESTED FAILSAFE MECHANISMS. THEY'RE NEARLY INCAPABLE OF FALLING.

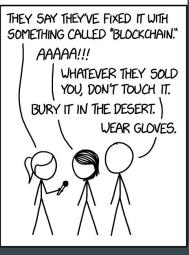

THAT'S TERRIFYING.
